### Alfa Laval wins SEK 90 million marine offshore order

**Alfa Laval – a world leader in heat transfer, centrifugal separation and fluid handling – has won an order to supply its Alfa Laval Aalborg boiler modules for an FPSO vessel to be built in China. The order, booked in the Marine & Offshore Systems segment, has a value of approximately SEK 90 million and delivery is scheduled for 2016.**

The boiler modules will be included in the power generation system of the FPSO vessel where they predominately will generate steam for the steam turbines but also provide cargo tank heating. Once built, the vessel will be anchored outside the Nigerian coast.

“I am pleased to announce yet another large order from the offshore oil and gas industry, and this time for our Alfa Laval Aalborg range” says Lars Renström, President and CEO of the Alfa Laval Group. “It is another confirmation of our position as a leading supplier of reliable equipment to the oil and gas industry.”
