Alfa Laval wins SEK 90 million power order in Middle East

Alfa Laval – a world leader in heat transfer, centrifugal separation and fluid handling – has won an order to supply heavy oil treatment systems to a power plant in Middle East. The order, booked in the Energy & Environment segment, has a value of approximately SEK 90 million and delivery is scheduled for 2013.

The Alfa Laval heavy oil treatment systems including various separators and heat exchangers will be installed in the power plant to treat the heavy fuel oil in order to make it suitable for use in the turbines.

“This is the single biggest order for our heavy fuel oil treatment systems and it confirms the increasing demand we see from the power industry“, says Lars Renström, President and CEO of the Alfa Laval Group.

Did you know that... the global energy demand is expected to grow by more than one-third over the period to 2035 with China, India and the Middle East accounting for 60 percent of the increase according to “World Energy Outlook, 2012”?

About Alfa Laval

Alfa Laval is a leading global provider of specialized products and engineering solutions based on its key technologies of heat transfer, separation and fluid handling.

The company’s equipment, systems and services are dedicated to assisting customers in optimizing the performance of their processes. The solutions help them to heat, cool, separate and transport products in industries that produce food and beverages, chemicals and petrochemicals, pharmaceuticals, starch, sugar and ethanol.
