

January 2023

Join Alfa Laval Net-zero launch event #3 – Together we can accelerate the energy transition!

Alfa Laval is back this February with more innovative products and insights to improve sustainability in your process applications. If you want to know how we can tackle some of the most pressing issues of our time, then Alfa Laval's Net-zero launch event is for you. This time we will be covering everything from energy efficiency and clean energy solutions, to minimizing the use of scarce resources and prolonging your process lifecycles.

"We will invite customers from around the world to join us, as we discuss the 'Innovation that accelerates sustainable solutions.' Our exciting line-up of speakers will take us on a deep dive into their area of expertise, showing us how to bring our commitments to energy efficiency, clean energy, and circularity to life," says Thomas Møller, Executive Vice President of Alfa Laval's Energy Division.

These three areas are the corner stones of Alfa Laval's sustainability offering for the energy market, and they are at the heart of what Alfa Laval can achieve for their customers all over the world. "We take the time to build lasting partnerships," continues Møller, "because we know that understanding our customers' businesses is vital when helping them transition away from the carbon economy and toward greater thermal efficiency. Trying to solve their challenges is what sparks our imagination and drives us toward greater innovation."

Alfa Laval is home to the latest thinking when it comes to creating innovative technologies that boost profits, cut costs, and improve sustainability. This event is set to summarize some key examples of this, including the many ways heat transfer technology has adapted to fit the changing data center industry, how fuel cells are transforming the hydrogen industry, and how we can reduce waste and costs with better recycling opportunities.

Our experts in the studio, will also share the latest Alfa Laval has to offer in heat transfer and separation technologies, as well as service solutions. This will include many exciting new products being launched. For example, we will be highlighting the new Alfa Laval T21, the AlfaNova GL50, our new decanter range, and much more.

So, if you want to be part of building a brighter future, you won't want to miss Alfa Laval's net-zero launch event. See you on the 15th of February 2023 at 14.00 CET. Read more and sign up here: www.alfalaval.com/netzerolaunchevent

Programme

- Opening: Thomas Møller, President Energy Division, Alfa Laval

Energy efficiency

- Alfa Laval T21 – The new versatile heat exchanger
- Alfa Laval and EcoDataCenter – Collaborating to develop sustainable data centers
- The smart heat exchanger – Boosting performance with connected solutions
- Alfa Laval Cooling Pod – New, innovative cooling solution for edge data centers

Clean energy

- Launching AlfaNova GL50 – Alfa Laval's first heat exchanger developed for tomorrow's fuel cell systems
- Liquid Wind – Renewable eMethanol production

Circularity

- Safety and sustainability in mining – From exploration to tailings dewatering
- Minimize waste and maximize efficiency in construction drilling

- Summary and closing: Thomas Møller, President Energy Division, Alfa Laval

Editor's notes

This is Alfa Laval

Alfa Laval is a world leader in heat transfer, centrifugal separation and fluid handling, and is active in the areas of Energy, Marine, and Food & Water, offering its expertise, products, and service to a wide range of industries in some 100 countries. The company is committed to optimizing processes, creating responsible growth, and driving progress to support customers in achieving their business goals and sustainability targets.

Alfa Laval's innovative technologies are dedicated to purifying, refining, and reusing materials, promoting more responsible use of natural resources. They contribute to improved energy efficiency and heat recovery, better water treatment, and reduced emissions. Therefore, Alfa Laval is not only accelerating success for its customers, but also for people and the planet. Making the world better, every day.

Alfa Laval has 17,900 employees. Annual sales in 2021 were SEK (Swedish Krona) 40.9 billion (approx. EUR 4 billion). The company is listed on Nasdaq Stockholm.
