### Alfa Laval wins SEK 70 million energy-efficiency order

**Alfa Laval – a world leader in heat transfer, centrifugal separation and fluid handling – has won an order to supply Alfa Laval OLMi heat exchangers to a petrochemical plant in Turkmenistan. The order, booked in the Energy & Process segment late March, has a value of approximately SEK 70 million and delivery is scheduled for 2016.**

The Alfa Laval OLMi heat exchangers will be used to increase the yield and recover energy in the production of ethylene, an important ingredient for the manufacturing of industrial chemicals and plastics products.

“We are pleased to have booked another large order for our OLMi heat exchangers,” says Lars Renström, President and CEO of the Alfa Laval Group. “It confirms that our OLMi products are very well suited for the petrochemical industry’s demanding applications.”
