Alfa Laval wins SEK 60 million refinery order

Alfa Laval – a world leader in heat transfer, centrifugal separation and fluid handling – has won an order for air cooled heat exchangers, to be installed in a refinery in the Middle East. The order has a value of approximately SEK 60 million and is booked in the Welded Heat Exchangers unit of the Energy Division. Deliveries are scheduled for 2020.

The order comprises Alfa Laval OLM I heat exchangers which will be used for cooling duties in the distillation unit of the refinery.

“This is the third large order in short time for our durable OLM I heat exchangers. These orders all prove that our heat exchangers meet the high demands from customers in the refinery industry,” says Susanne Pahlén Åklundh, President of the Energy Division.

Did you know that... in the distillation unit the hot crude oil is separated into different fractions such as gasoline and diesel?

About Alfa Laval

Alfa Laval is a leading global provider of specialized products and engineering solutions based on its key technologies of heat transfer, separation and fluid handling.

The company's equipment, systems and services are dedicated to assisting customers in optimizing the performance of their processes. The solutions help them to heat, cool, separate and transport products in industries that produce food and beverages, chemicals and petrochemicals, pharmaceuticals, starch, sugar and ethanol.

Alfa Laval's products are also used in power plants, aboard ships, oil and gas exploration, in the mechanical engineering industry, in the mining industry and for wastewater treatment, as well as for comfort climate and refrigeration applications.

Alfa Laval's worldwide organization works closely with customers in nearly 100 countries to help them stay ahead in the global arena. Alfa Laval is listed on Nasdaq OMX, and, in 2018, posted annual sales of about SEK 40.7 billion (approx. 4.0 billion Euros). The company has about 17 200 employees.
