### Alfa Laval wins SEK 155 million off-shore orders in Brazil

**Alfa Laval – a world leader in heat transfer, centrifugal separation and fluid handling – has won two orders to supply Framo pumping systems for two FPSO (Floating Production, Storage and Offloading) vessels to operate outside the coast of Brazil. The orders have a total value of approximately SEK 155 million and are booked in the Pumping Systems unit of the Marine Division, with deliveries scheduled for 2021.**

The two orders comprise marine pumping systems for firewater and sea water lift service.

“I am pleased to announce these two large orders for our Framo pumping systems. These reliable and durable systems are used in a variety of duties, where they provide safe operations and optimized performance,” says Sameer Kalra, President of the Marine Division.

**Did you know that...** Framo pumping systems are used in four main areas: cargo, offshore, environmental and aquaculture?

#### **This is Alfa Laval**

Alfa Laval is active in the areas of Energy, Marine, and Food & Water, offering its expertise, products, and service to a wide range of industries in some 100 countries. The company is committed to optimizing processes, creating responsible growth, and driving progress – always going the extra mile to support customers in achieving their business goals and sustainability targets.

Alfa Laval's innovative technologies are dedicated to purifying, refining, and reusing materials, promoting more responsible use of natural resources. They contribute to improved energy efficiency and heat recovery, better water treatment, and reduced emissions. Thereby, Alfa Laval is not only accelerating success for its customers, but
