1

Alfa Laval SX Rotary Lobe Pump

Designed to offer the ultimate in cleanability for applications such as baby food, where safety is paramount.

2

Alfa Laval Unique Single Seat Valve

Formed from a single stainless steel disc with no welds, the valve body is extremely rigid and durable, ensuring hygienic processing and high product quality that is crucial for baby food production.

3

Alfa Laval Contherm®

This hygienic scraped-surface heat exchanger is ideal for demanding processing requirements, such as high viscosity baby food.
