1

Alfa Laval Unique SSV Long Stroke Valve

Ensures gentle handling of liquid products containing solids and delicate particles, such as diced tomatoes, tomato pips, and skin.

2

Alfa Laval SRU Rotary Lobe Pump

Low shear pumping action maintains product integrity for tomato-based production.

3

Alfa Laval Rotary Jet Head

The Alfa Laval rotary jet heads ensure 360° full coverage of the inner tank surface. The process can be monitored using Alfa Laval Rotacheck+.

4

Alfa Laval installation materials

Various installation materials, including AL-6XN, are available for tomato-based processes, where the challenge is that standard stainless steel installation materials cannot be used
