

March 2022

## Charting the course to sustainable shipping at Alfa Laval's Marine Innovation Summit 2022

**On 29<sup>th</sup> March, thought leaders from across the maritime industry will come together online for the Marine Innovation Summit 2022. Registration is open for the livestream event, which will highlight the challenges and opportunities ahead as the shipping world pursues bold sustainability targets.**

### **Bringing the future into focus**

The Marine Innovation Summit, created in 2021 and hosted by Alfa Laval, is a forum for exploring sustainability and the marine industry's progress in reaching it. Building on the success of last year's event, this year's summit will be open and free to anyone who registers.

"Sustainability, both on an environmental level and on a human level, is key to our maritime future. New technologies and solutions on board vessels are needed to achieve the decarbonization goals, and digital solutions will be one key element in getting there," says Sameer Kalra, President, Alfa Laval Marine Division. "Achieving sustainability requires that we work together, which begins with open discussion. By following the dialogue at the Marine Innovation Summit 2022, participants will gain insights from some of the sharpest minds in our industry."

### **Prominent speakers and panellists**

During the livestream of just over two hours, a breadth of industry profiles will take the floor at the Marine Innovation Summit 2022. They include keynote speaker Dr Cleopatra Doumbia-Henry, President of the World Maritime University, as well as inspirational speaker Per Olof Arnäs, Senior Logistics Strategist at Einride.

During two panel discussions, representatives from notable shipping companies, research institutes and more will share their thoughts on where the shipping industry is headed – and how it will get there.

**Editor's notes**

**This is Alfa Laval**

Alfa Laval is a world leader in heat transfer, centrifugal separation and fluid handling, and is active in the areas of Energy, Marine, and Food & Water, offering its expertise, products, and service to a wide range of industries in some 100 countries. The company is committed to optimizing processes, creating responsible growth, and driving progress to support customers in achieving their business goals and sustainability targets.

Alfa Laval's innovative technologies are dedicated to purifying, refining, and reusing materials, promoting more responsible use of natural resources. They contribute to improved energy efficiency and heat recovery, better water treatment, and reduced emissions. Thereby, Alfa Laval is not only accelerating success for its customers, but also for people and the planet. Making the world better, every day.

Alfa Laval has 17,900 employees. Annual sales in 2021 were SEK 40.9 billion (approx. EUR 4 billion). The company is listed on Nasdaq Stockholm.
