

Alfa Laval Service Centre Staffanstorps

Ready to assist you

Your service partner for plate heat exchangers

At the Alfa Laval Service Centre in Staffanstorp we service and recondition plate heat exchangers of all brands, restoring them to as-good-as-new condition. As one of the world's leading manufacturers of plate heat exchangers, we know exactly how to maintain your equipment to ensure high and reliable performance over time.

We strive to deliver the highest possible levels of service and quality. Thanks to our deep technical knowledge and extensive experience from all types of processes and applications, we can help you maximize the performance and lifetime of your heat exchangers – regardless of brand.

With Alfa Laval as your service partner, you benefit from having one supplier covering the entire service need of all your different plate heat exchangers.

Our reconditioning engineers are always ready to assist you with fast and efficient service, either on site or at our service centre in Staffanstorp.

Professional service

When you leave your equipment with us, you can rest assured that it will be in top condition and meet all specifications when we return it.

We are glad to support you with the necessary scheduling of your services, making it easy for you to plan your production and avoid unnecessary downtime.

Our experienced service engineers diagnose and restore your plate heat exchangers to prime working condition. We can provide a complete range of services, from on-site condition monitoring (AlfaCheck), integrity test and cleaning-in-place (CIP) solutions that optimize operational efficiency, to reconditioning or replacement of plates for heat exchangers of all brands.

Optimized workflow

The workflows in our service centre in Staffanstorp have been optimized for efficiency, reliability, and throughput. Based on Lean principles, the layout of the 1,200 m² workspace allows us to service our customers' equipment quickly and smoothly.

We perform all core service activities inhouse to ensure quality, quick turnaround times, and full control. The Alfa Laval Service Centre in Staffanstorp services plate heat exchangers of all sizes and brands, and the built-in redundancy in our organization allows us to ensure on-time deliveries even if unexpected events occur.

Safety

Safety is always our top priority, and our technicians follow strict procedures to ensure that all safety guidelines are fulfilled and to minimize risk in the service process.

All work is carefully carried out according to unique procedures for each specific model, and we carefully document the service process at every step.

Sustainability

For us at Alfa Laval, sustainability is at the core of what we do. All our products aim to make our customers processes more environmentally friendly in some way, for example by minimizing waste, water consumption or CO₂ emissions.

We have an ambitious goal of becoming carbon neutral by 2030 and at our service centre in Staffanstorp we continuously work to minimize our environmental impact.
