

Alfa Laval unveils new innovations to support clean energy scale-up on the main stage at CIIE Shanghai

As one of the world's largest events, the China International Import Expo (CIIE) brings global companies, sustainability innovators and government officials together with over 400,000 visitors yearly, to strengthen business cooperation and a joint sustainability agenda.

This year marks Alfa Laval's 40th anniversary in China. At this special milestone for the company, Alfa Laval is nominated to present at the main stage at the groundbreaking CIIE event as one of the dedicated drivers of a new energy landscape emerging in China. Since the establishment in the country in 1984, Alfa Laval has continually invested in enhancing manufacturing and service capabilities, as well as in advancing sustainability ambitions within vital industries with its core technologies. China is one of the world's largest economies with immense potential to scale up clean energy and foster new innovations, and with the dual carbon goal, Alfa Laval's innovative solutions are on route to fast-tracking progress.

On the main stage at CIIE, Alfa Laval will introduce the all-new semi-welded plate heat exchanger live on CCTV. It is the first time Alfa Laval launches a global new product in China and simultaneously a knowledge-packed white paper on how heating and cooling is essential in building sustainable cities will be released.

On Nov 6th from 14:30 to 14:45, Christian Thomsen, President Northeast Asia, and Julien Gennetier, Vice President Energy Division will present Alfa Laval's 40-year journey in China and how the clean energy landscape will be further progressed through its introduction of the new T25 SW plate heat exchanger. For Alfa Laval in China, it's a core platform to showcase innovations and sustainable solutions to industry and government key stakeholders and foster valuable partnerships and dialogue.

"We're introducing several exciting firsts at this CIIE: unveiling the new T25 semi-welded for the first time in China, launching our 'Sustainable Cities: Heating and Cooling Whitepaper,' and showcasing the industry's first heat exchanger with low-emission stainless steel plates made in China from our Jiangyin Factory. These 'firsts' are testaments to our dedication to innovation, sustainability, and our strong presence in the Chinese market." Julien Gennetier, Vice President of the Energy Division, Alfa Laval

"This marks Alfa Laval's fourth year at CIIE and our 40th anniversary here in China. Alfa Laval keeps investing in upgrading manufacturing and service capabilities and now it's one of the biggest markets for Alfa Laval. As an industry leader, we're aiming to Pioneer positive impact with new technologies and solutions contributing to the sustainable future of China." Christian Thomsen, President, Northeast Asia cluster, Alfa Laval

This is CIIE

Held annually in Shanghai, The China International Import Expo (CIIE) is dedicated to promoting imports and strengthening China's global connections. It is organized by the Ministry of Commerce and the Shanghai Municipal Government, with support from the World Trade Organization, the United Nations Conference on Trade and Development, and other international organizations and will take place from November 5-10 2024.

CIIE facilitates countries and regions all over the world to strengthen economic cooperation and trade, gathering government officials, business communities, exhibitors and professional purchasers.

This is Alfa Laval

The ability to make the most of what we have is more important than ever. Together with our customers, we're innovating the industries that society depends on creating positive impact. We're set on helping billions of people to get the energy, food, and clean water they need. And, at the same time, we're decarbonising the marine fleet that's the backbone of global trade.

We pioneer technologies and solutions that free our customers to unlock the true potential of resources. As our customers' businesses grow stronger, the goal of a truly sustainable world edges closer. The company is committed to optimizing processes, creating responsible growth, and driving progress to support customers in achieving their business goals and sustainability targets. Together, we're pioneering positive impact.

Alfa Laval was founded 140 years ago, has customers in some 100 countries, employs more than 22,000 people, and annual sales in 2023 were SEK 63.6 billion (5.5 BEUR). The company is listed on Nasdaq Stockholm.
