Make uptime happen at BrauBeviale2015

At BrauBeviale 2015 in Nürnberg, Germany, 10-12 November, we share our wide range of well-proven formulas for optimizing beverage production. By supplying robust, reliable and energy-efficient equipment, Alfa Laval helps beverage producers maximize their energy efficiency, uptime, water savings and waste recovery, achieving the highest production yield and quality possible.

Comprehensive service offering

Over the past 130 years, Alfa Laval has built a global presence with service centres and partners in nearly 100 countries. Service specialists are ready to assist customers by phone or on-site, by performing routine maintenance, securing parts, troubleshooting complex issues or evaluating equipment and making expert recommendations.

Service demonstrations

At BrauBeviale 2015, we will present some of the solutions that ensure more uptime and optimization in customer operations with service demonstrations for the Alfa Laval Clara20. Demonstrations will be held at the Alfa Laval stand in, Hall 7, stand 7-731.

Schedule:

November 10-11: 10:00 / 13:00 / 16:00

November 12: 10:00 / 13:00

360° Service Portfolio

The 360° Service Portfolio contains all the services needed to get optimal performance, maximum uptime and operating efficiency from Alfa Laval equipment. It includes assistance in maintaining and optimizing equipment as the plant operations develop and change over time, from the initial set-up all the way to eventual redesign.

Alfa Laval experts will be on-site sharing their knowledge on extending performance of Alfa Laval equipment, modules and solutions.

Performance agreements

Performance Agreements are tailor-made service solutions that meet the specific needs of each customer by combining any of the services in our 360° Service portfolio. They offer true peace of mind by securing top performance with advance knowledge of service costs and a short payback time.

About Alfa Laval

Alfa Laval is a leading global provider of specialized products and engineering solutions based on its key technologies of heat transfer, separation and fluid handling.

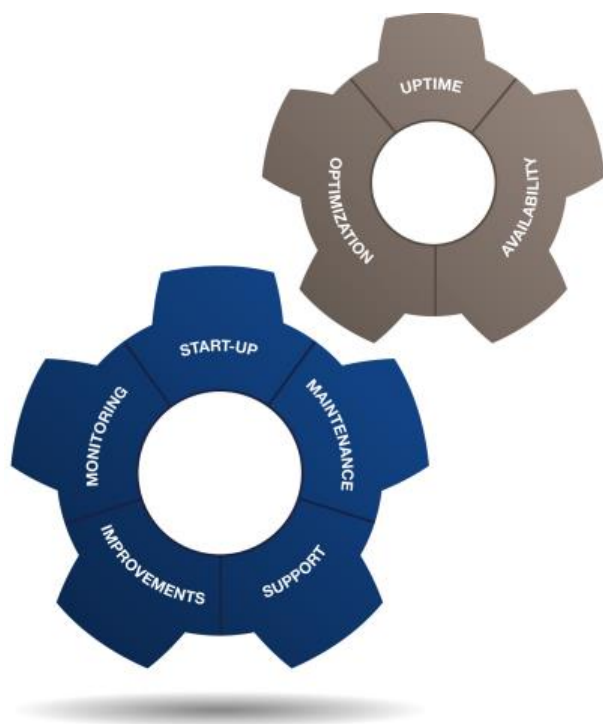

The company's equipment, systems and services are dedicated to assisting customers in optimizing the performance of their processes. The solutions help them to heat, cool, separate and transport products in industries that produce food and beverages, chemicals and petrochemicals, pharmaceuticals, starch, sugar and ethanol.

Alfa Laval's products are also used in power plants, aboard ships, in the mechanical engineering industry, in the mining industry and for wastewater treatment, as well as for comfort climate and refrigeration applications.

Alfa Laval's worldwide organization works closely with customers in nearly 100 countries to help them stay ahead in the global arena.

Alfa Laval is listed on Nasdaq OMX, and, in 2014, posted annual sales of about SEK 35.1 billion (approx. 3.85 billion Euros). The company has about 18 000 employees.
