Alfa Laval AC brazed plate heat exchangers provide efficient heat transfer with a small footprint. They are specifically designed to work in air conditioning and refrigeration applications as evaporators and condensers in chillers and heat pumps.

**Applications**
- Evaporator
- Condenser

**Benefits**
- Compact
- Easy to install
- Self-cleaning
- Low level of service and maintenance is required
- All units are pressure and leak tested
- Gasket free

**Design**
The brazing material seals and holds the plates together at the contact points ensuring optimal heat transfer efficiency and pressure resistance. Using advanced design technologies and extensive verification guarantees the highest performance and longest possible service life.

Different pressure ratings are available for different needs.

The True dual-circuit design provides a higher freezing resistance compared to back-to-back solutions.

Designed for high-efficiency applications, such as those applications with high evaporation temperature and low water/brine pressure drop. This results in reduced environmental impact and lower costs.

The integrated distribution system ensures an even distribution of the refrigerant throughout the plate package.

Based on standard components and a modular concept, each unit is custom-built to meet the specific requirements of each individual installation.

Suitable with most HFC, HFO and natural refrigerants.
Technical Data

Standard materials
Cover plates  Stainless steel
Connections  Stainless steel
Plates  Stainless steel
Brazing filler  Copper

Dimensions and weight
A measure (mm)  \(13 + (2.14 \times n)\)
A measure (inches)  \(0.51 + (0.08 \times n)\)
Weight (kg)  \(6 + (0.4 \times n)\)
Weight (lb)  \(13.23 + (0.88 \times n)\)

1. \(n\) = number of plates
2. Excluding connections

Standard data
Volume per channel, litres (gal)  (S1-S2): 0.16 (0.040) (S3-S4): 0.20 (0.052)
Max. particle size, mm (inch)  0.9 (0.035)
Max. flowrate 1 m³/h (gpm)  60 (264)
Flow direction  Parallel
Min. number of plates  10
Max. number of plates  260

1. Water at 7 m/s (16.4 ft/s) (connection velocity)

Dimensional drawing
Measurements in mm (inches)

Design pressure and temperature
AC232DQ/ACH232DQ – PED approval pressure/temperature graph
AC232DQ/ACH232DQ – UL approval pressure/temperature graph

Designed for full vacuum.

Alfa Laval plate heat exchangers are available with a wide range of pressure vessel approvals. Please contact your Alfa Laval representative for more information.

NOTE: Values above are to be used as an indication. For exact values, please use the drawing generated by the Alfa Laval configurator or contact your local Alfa Laval representative.

How to contact Alfa Laval
Contact details for all countries are continually updated on our website. Please visit www.alfalaval.com to access the information direct.
