Alfa Laval CB brazed plate heat exchangers provide efficient heat transfer with a small footprint.

**Applications**
- HVAC heating and cooling
- Refrigeration
- Oil cooling
- Industrial heating and cooling

**Benefits**
- Compact
- Easy to install
- Self-cleaning
- Low level of service and maintenance is required
- All units are pressure and leak tested
- Gasket free

**Design**
The brazing material seals and holds the plates together at the contact points ensuring optimal heat transfer efficiency and pressure resistance. Using advanced design technologies and extensive verification guarantees the highest performance and longest possible service life.

Different pressure ratings are available for different needs.

The unit can be supplied with a refrigerant distribution system for optimal evaporator performance.

Based on standard components and a modular concept, each unit is custom-built to meet the specific requirements of each individual installation.

**Examples of connections**
- External thread
- Internal thread
- Soldering
- Welding
