

Alfa Laval Service Kits for Separators

Easier maintenance for increased efficiency

Regular maintenance according to recommended service intervals is essential to safeguarding the performance of your separator and preventing unplanned downtime. Alfa Laval Service Kits simplify your maintenance activities, saving you both time and money.

What we do

Based on years of experience, our experts have developed Alfa Laval Service Kits that include everything you need for planned maintenance. Kits are available to help you throughout the lifecycle of your separator, from commissioning to inspections and preventive maintenance.

Alfa Laval Service Kits feature only genuine Alfa Laval spares and contain the most up-to-date parts – plus any new parts that can be retrofitted to older equipment. This ensures that your equipment uses the latest technology available.

Benefits

- Peace of mind – all spare parts in one place when service is due
- Replacement only of what is needed at the specific service interval
- Perfect match – original parts designed for your equipment and operating conditions
- Highest reliability – no unnecessary breakdowns
- Top performance

Scope of supply

Alfa Laval Service Kits contain all the genuine spare parts required for a specific service. This reduces order handling time and offers an advantage over purchasing individual parts, since multiple parts are needed for most maintenance procedures. If design changes have been made to a part, an updated part is automatically included.

Alfa Laval Service Kits are available for:

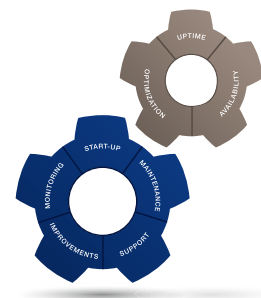

- Commissioning
- Upgrading
- Preventive maintenance
- Intermediate/inspection service
- Major/overhaul service
