

Heat transfer service across brands

Alfa Laval can service any plate heat exchanger, regardless of the brand or model.

We can even supply compatible gaskets for heat exchanger models from other brands. These gaskets comply with the quality standards of Alfa Laval.

This document provides an overview of the most common plate heat exchanger brands for which Alfa Laval supplies compatible gaskets. Many are stocked; some are made to order. However, we also have access to additional brands, and can supply compatible gaskets for many brands that do not appear on this list. If your brand is not listed, please contact your Alfa Laval representative.

If required, Alfa Laval can supply the compatible plates for many models as well.
