

Operate

How it works

We provide a fast supply of complete blocks for various Compabloc models, ensuring that replacements meet original equipment specifications. This service is designed for customers with Compablocs in critical applications, allowing you to return to peak performance with minimal downtime. We can perform the block replacement at your site or in one of our service centers, identifying potential process issues on demand to prevent future challenges.

How the service can be delivered

On site

Remotely

At service centres

On board

In dry dock

Alfa Laval

Fast Track

for Compabloc

Rapid response for critical operations

Our Fast Track service ensures that customers with heat exchangers in critical positions experience minimal operational interruptions. With a ready-to-ship replacement block available, we help mitigate the costs of unplanned production stops while prioritizing safety for people and the environment.

Our service helps you with:

- Minimizing downtime with quick replacement solutions
- Enhancing safety by addressing leakages promptly
- Reducing operational costs associated with unplanned stops

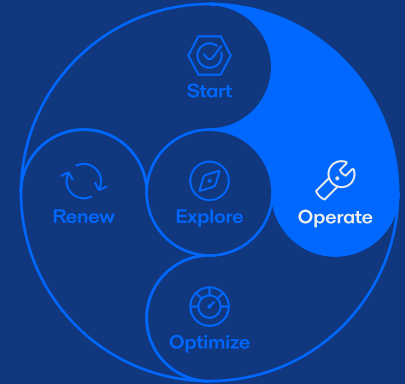

24/7/365 Service and Support

With service centres, field service engineers and spare parts distribution hubs around the world, the Alfa Laval Service network is always on the job for you.

When you contact our 24/7/365 Service and Support, our experts coordinate everything to quickly address your needs – either remotely via our digital tools or on site.
