

Alfa Laval

# Spare parts

for Compabloc

## Extend the life and performance of your heat exchanger

Secure a smooth and reliable operation of your equipment with genuine spare parts from Alfa Laval. Each component is specifically designed for your heat exchanger, guaranteeing optimal performance and longevity. By keeping critical spare parts stocked on-site, you minimize downtime for replacements and ensure top performance for years to come.

Our service helps you with:

- Maximizing uptime
- Reducing costs
- Extending equipment lifespan
- Ensuring safety and compliance

## How it works

All our spare parts meet international industry standards and always come with a warranty of quality. Spare parts are offered separately or as part of a service.

We recommend including a maintenance kit when you purchase your equipment. This will facilitate servicing and support proactive maintenance planning. Once, your equipment is in operation, it's advisable to order spare parts well in advance of any scheduled maintenance to minimize downtime.

We also encourage you to review and adjust your spare parts inventory based on how critical the equipment is to your process. With a tailored stock strategy, you're always prepared.

For expert guidance and rapid delivery, contact your local Alfa Laval representative.

Key spare parts:

- Block – contains the core of the heat exchanger, securing the thermal exchange between the two fluids. It is a custom-made component by Alfa Laval, crucial for preventive and reactive maintenance.
- Gaskets – provide a tight seal.
- Bolting (nuts, washers, threaded rods) – compresses the gasket between the panel and the frame to prevent leaks.

## How the service can be delivered

On site

Remotely

At service centres

On board

In dry dock

### 24/7/365 Service and Support

With service centres, field service engineers and spare parts distribution hubs around the world, the Alfa Laval Service network is always on the job for you.
