Alfa Laval joins the Carrier Alliance Supplier Program

Alfa Laval – a world leader in heat transfer, centrifugal separation and fluid handling – is proudly announcing that we have joined the Carrier Alliance Program hosted by Carrier Global Corporation, the leading global provider of healthy, safe, and sustainable building and cold chain solutions.

As part of a strategic long-term agreement, Alfa Laval will supply engineered heat exchangers across Carrier’s Commercial HVAC and Refrigeration portfolios globally. “We are pleased to welcome Alfa Laval as one of the newest Carrier Alliance suppliers with the execution of this global long-term agreement,” said Ed Dunn, vice president, Supply Chain, Carrier. “Over the years, Alfa Laval has supported Carrier by providing best-in-class components that help improve reliability, reduce operating cost and increase uptime.”

Alfa Laval and Carrier have collaborated for many years in Carrier’s Refrigeration and Commercial HVAC businesses, with a focus on developing more sustainable solutions and reducing the environmental impact of heating and cooling equipment components. Alfa Laval’s unique range of sustainable features for heat exchangers helps improve thermal efficiency and optimize pressure drops, reducing energy consumption in HVAC and refrigeration equipment.

Joining the Carrier Alliance program is a win-win for Alfa Laval and Carrier as it establishes Alfa Laval as a key supplier across Carrier’s businesses and paves the way for future opportunities to supply innovative technologies across Carrier’s portfolio.

“Sustainability and energy efficiency are core values for Alfa Laval and play an important role in our product development. Therefore, it is especially rewarding to have our heat exchangers onboard Carrier systems and be part of delivering those values to the industry. In addition, a customer-centric organization and first-class manufacturing capabilities make us the right fit for the Carrier Alliance. We look forward to continuing this great collaboration”, said Fredrik Ekström, President Business Unit Brazed & Fusion Bonded Heat Exchangers, Alfa Laval.

This is Alfa Laval

Alfa Laval is active in the areas of Energy, Marine, and Food & Water, offering its expertise, products, and service to a wide range of industries in some 100 countries. The company is committed to optimizing processes, creating responsible growth, and driving progress – always going the extra mile to support customers in achieving their business goals and sustainability targets.

Alfa Laval's innovative technologies are dedicated to purifying, refining, and reusing materials, promoting more responsible use of natural resources. They contribute to improved energy efficiency and heat recovery, better water treatment, and reduced emissions. Thereby, Alfa Laval is not only accelerating success for its customers, but also for people and the planet. Making the world better, every day. It's all about *Advancing better*[™].

Alfa Laval has 17,500 employees. Annual sales in 2019 were SEK 46.5 billion (approx. EUR 4.4 billion). The company is listed on Nasdaq OMX.
