

Alfa Laval Performance Audit for PureSOx

Evaluating performance to ensure compliance

High performance from your Alfa Laval PureSOx system is essential, both for your emissions compliance and for your operating economy. Regular inspection in the form of a Performance Audit ensures that your system performs as it should, but also gives you opportunities to lower its cost of operation.

What we do

A Performance Audit is an onboard equipment survey that can be performed anywhere in the world. We assess the functional performance of your PureSOx system, looking for ways to optimize it and to lower costs by reducing its consumption of energy and process fluid.

Our skilled service engineers conduct a thorough inspection of system parameters and software performance, but also evaluate the operational skills of your crew. Afterwards we provide a detailed report of the findings, along with recommendations for optimization and upgrades.

Benefits

- Optimized system parameters and performance
- Reduced consumption of energy and process fluid
- Reduced operating costs
- Improved crew knowledge and uniform operating procedures
- Opportunities to take advantage of new upgrade possibilities

Scope of service

- **On board meeting**
Before and after inspecting your PureSOx system, an Alfa Laval service engineer meets with your chief engineers to discuss its condition and performance.
- **System inspection**
Our field service engineer inspects all parameters of your PureSOx system, as well as its software performance.
- **Crew evaluation**
Our field service engineer meets with the crew to evaluate their operational skills and provide any relevant Service Bulletins.
- **Detailed inspection report**
Following the inspection, Alfa Laval provides an audit report documenting:
 - Work completed
 - System performance
 - Failures identified
 - Recommendations for maintenance and further action
 - Opportunities to optimize performance

Scope of supply

Performance Audits can be performed on all Alfa Laval PureSOx systems, regardless of configuration.

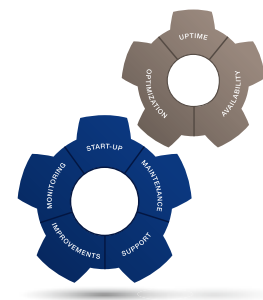

Other 360° Service Portfolio services for your equipment
