

Training for marine equipment operators

## Reach your full potential

Alfa Laval equipment is built to the highest of standards. To get the most out of your equipment, you need to know how to work to the highest standards. Training is one of the best ways to ensure that you always operate your Alfa Laval marine equipment in a safe, efficient and regulatory-compliant manner.

### Get the most out of your marine equipment

Quality. Reliability. Performance. Those are the hallmarks of Alfa Laval equipment. To get the most out of your Alfa Laval equipment, you need to make sure your people have the right know-how. The right training gives them a broad understanding of how to operate and maintain equipment and the practical skills to do so.

### Competence development for marine equipment users

Need to learn the basics? Expand on what you already know? Or develop completely new skills? Alfa Laval provides flexible learning options to accommodate different learning styles and requirements. Whether taking a course at one of our Alfa Laval training centres, onboard, at one of your facilities, or online, you can be sure to see results in terms of increased sailing time, improved safety and performance, reduced operating costs as well as regulatory compliance.

### Get expertise from the experts

Take advantage of the Alfa Laval training programmes for users of marine equipment. Learn from Alfa Laval instructors who blend hands-on experience operating and maintaining equipment with theoretical and design-related expertise. You get the best of both worlds: a combination of theory and practical skills that enables you to take full advantage of state-of-the-art Alfa Laval marine equipment.

#### Marine industry challenges

Today's business environment is more competitive than ever. Maximizing uptime and minimizing costs is a business imperative. Sailing ships with state-of-the-art systems requires well-trained, competent personnel to operate and maintain them.

#### The value of marine training

Course participants come away with the know-how and practical skills required to operate and maintain advanced onboard systems and equipment. With thorough product knowledge and insights into preventive maintenance strategies, you are assured your Alfa Laval equipment will deliver optimal performance.

## Training overview

Choose from a broad range of Alfa Laval training courses covering the entire Alfa Laval product portfolio – from bilge and ballast water treatment systems to fuel conditioning modules and plate heat exchangers.

Select from standardized training modules that cover the basics. Or tailor your training programme with content that meets your exact requirements and matches the level of competence of your crew. Focus on specific topics and applications or on service, operation, maintenance and troubleshooting. You decide.

## What's in it for you

- A more confident and competent crew
- Increased safety and equipment reliability
- Reduced operating and maintenance costs
- More sailing time
- Longer equipment lifetime
- Compliance with regulatory requirements

## Contact us

Want to learn more? Contact your local Alfa Laval representative to discuss your training needs or check out [alfalaval.com/marine-training](http://alfalaval.com/marine-training).

## Who, what, when, where and how

<b>Who</b>	Users of marine equipment
<b>What</b>	Standard, customized or digital training programmes
<b>When</b>	Upon request, according to your schedule
<b>Where</b>	An appropriate venue: onboard your ship, at an Alfa Laval training centre or site, or other mutually agreed upon location
<b>How</b>	Knowledge transfer from our experts to your crew based on the level of experience of the course participants.
