

2020 Spare Parts Kit for Alfa Laval Aalborg boilers

Wear and tear part kit to maximize uptime and reduce cost

Having a boiler out of service due to burner failure – even for a short time – can result in serious consequences. With an Alfa Laval 2020 Spare Parts Kit on board, you have the OEM parts needed to quickly restore the function of your Alfa Laval Aalborg boiler. The kit contains the gaskets, sealing and nozzles we recommend for replacing fuel line and burner components exposed to acidic content in low-sulphur fuels.

What we do

Long-term use of low-sulphur fuels will result in additional wear to gaskets and sealings, caused by the acidic content in biodiesel or fatty acid methyl ether (FAME). Since this wear will be most predominant in valves, pumps and nozzles, our experts have put together a convenient spare parts kit with necessary gaskets, sealings and replacement nozzles.

We recommend checking wear and tear parts regularly and exchanging them when their condition has deteriorated. Alfa Laval maintains stock of wear and tear parts for reorder globally. However, having an Alfa Laval 2020 Spare Parts Kit on board will safeguard boiler uptime, ensuring a high steam capacity at all times and avoiding potential rush order deliveries.

Benefits

- Constant availability of OEM wear and tear parts
- Maximized uptime
- Retained steam capacity
- Avoided freight charges, and rush order fees

Scope of service

- **Wear and tear kit with OEM parts**

With OEM knowledge and deep insight into 2020 fuel challenges, Alfa Laval experts have created 2020 Spare Parts Kits for different boiler fuel line configurations (see below). Supplied OEM wear and tear parts are clearly marked to quickly restore boiler function.

- **Remote assistance**

With the required parts on hand in the kit, crews can exchange the necessary component themselves. An overhaul can thus be completed without waiting for parts or scheduling an additional service visit. If needed, Alfa Laval can provide supplemental guidance by phone or e-mail.

Scope of supply

Alfa Laval 2020 spare part kits are available for the Alfa Laval boilers with the following fuel line configurations:

- Single-Line Fuel System
- Double-Line Fuel System

Other 360° Service Portfolio services for your equipment

- Condition Audit for Aalborg boilers
- Performance Audit for Aalborg boilers
